Professional Summary

Computer Science undergraduate passionate about AI, machine learning, and full-stack development. Experienced in building AI-powered applications using Python, React, FastAPI, and Ollama. Interested in solving real-world problems through intelligent automation and scalable software systems.

Education

Delhi Public School(Class XII(HSC)) : 75.2%

Sandip University(Bachelor of Technology in Computer Science Engineering) : 8.7 GPA

Skills

Programming Languages: Python, C++, Java, C#

Web & Frameworks: React.js, Flask, FastAPI, HTML, CSS

AI/ML & Computer Vision: OpenCV, YOLO, Ollama, Llama 2

Tools & Platforms: Git, Docker, AWS (EC2, S3)

Game Development: Unity, 2D Animation

Core Concepts: Machine Learning, REST APIs, Automation, Full-Stack Development

Projects

Crowd Panic and Disaster Management System:

Built an AI-based crowd monitoring system to analyze emotions and detect panic situations in real time using machine learning and computer vision techniques. **(Python,Flask,HTML,OpenCV,yolo,React)**

OllamaChatbot:

Developed a personalized AI chatbot using Ollama and Llama 2 that can be trained on custom CSV datasets to provide user-specific responses and information retrieval.**(python,llama 2.0,html,ollama)**

Photography Website:

Designed and developed an interactive 3D photography portfolio website using React with modern UI/UX animations to improve user engagement.**(React,CSS,ThreeJS)**

Edufusion:

Designed a educational Application for kids Based on theme “Lower size and offline”.I developed this using unity and c sharp with interactive 2d animations and intresting study oriented games.**(Unity,C#)**

Work Experience

Kognivia Analytics

AI/ML intern:

Assisted in AI workflow integration and API development tasks.
Collaborated with the team on model integration and automation solutions.
Gained hands-on experience in real-world AI/ML development processes.
